## ***INTRODUCTION***

---

This Summary Report, published every two years, provides an outline of the Local Roads Improvement Program's (LRIP) performance for the current biennium.

Illustrated in the report is:

- (1) LRIP performance by program component.
- (2) Number of projects by program component.
- (3) Distribution of funds by improvement type.
- (4) Number of projects by improvement type.
- (5) Program compliance review.

The bulk of this report contains a listing of individual projects in each county, the improvement types, the costs associated with each project, and the LRIP funding level. The information in this report is current as of ***June 10, 2003***. Not all projects or program activity from the 2002-2003 biennium have been completed as of June 10, 2003. Therefore, project listings in this report may not agree with the program information provided at a later date.

The projects reflect the department's intent to assist local governments in improving the local highway system. Poor roads mean more crashes and deaths, higher insurance costs, more wear and tear on vehicles, more time on the road and less efficient and competitive commerce. Each wisely invested dollar returns user benefits in terms of timesavings, fewer crashes, decreased vehicle operating costs and more competitive business.

## ***LOCAL ROADS IMPROVEMENT PROGRAM (LRIP)***

---

The Local Roads Improvement Program (LRIP), established in 1991, provides state funds to assist local units of governments in improving *seriously deteriorating* town roads, municipal streets in cities and villages, and county highways. The program consists of three general components: one for towns, one for cities and villages, and one for counties. Within each component, there is an entitlement component and a discretionary component. The entitlement component for cities and villages is further divided into one for communities with a population over 20,000 and another for communities with a population under 20,000.

The entitlement components provide funds to towns, villages, cities and counties based on the amount of mileage or a combination of mileage and population. The discretionary components provide funds on a competitive basis for high-cost road improvements. The program components are:

- ❖ **County Highway Improvement Program (CHIP).** The CHIP component received 43% of the statewide entitlement funds and programmed these dollars for improvements to county trunk highways. Allocations are directly provided to each county based 60% on population and 40% on county highway mileage.
- ❖ **Municipal Street Improvement Program (MSIPLT).** MSIPLT is for cities and villages with populations of less than 20,000. Allocations are made to the group of municipalities in each county (e.g. MSIP committees) based 50% on population and 50% on municipal street mileage.
- ❖ **Municipal Street Improvement Program (MSIPGT).** MSIPGT is for cities and villages with populations of more than 20,000. Together with the MSIPLT component, these two components received 28.5% of the statewide entitlement funds. Allocations are directly provided to these larger municipalities based 50% on population and 50% on municipal street mileage.
- ❖ **Town Road Improvement Program (TRIP).** The TRIP component received 28.5% of the statewide entitlement funds and programmed these dollars to town roads. Allocations are made to the group of towns in each county (e.g. TRIP committees) based on town roadway mileage.
- ❖ **County Highway Improvement Program - Discretionary (CHIP-D).** CHIP-D is a competitive component specifically targeted to high-cost county highway improvement projects costing \$250,000 or more. CHIP-D committees established in each of the eight WisDOT transportation districts select the discretionary projects.
- ❖ **Municipal Street Improvement Program - Discretionary (MSIP-D).** MSIP-D is a competitive statewide component specifically targeted to high-cost municipal street improvement projects costing \$250,000 or more.
- ❖ **Town Road Improvement Program - Discretionary (TRIP-D).** TRIP-D is a competitive statewide component specifically targeted to high-cost town road improvement projects costing \$100,000 or more.

Additional draw-downs on LRIP funds include the payment of administrative fees to county highway departments and, if applicable, legislative earmarks. LRIP reimburses each approved project up to a maximum of 50% of the total project costs.

Wisconsin Statute s.86.31 governs LRIP while Administrative Rule *Trans 206* further defines and interprets procedures for LRIP. Decisions affecting LRIP occur at the local and state levels. Project selection, bid lettings (which are required) and project administration are handled at the local level. At the state level, WisDOT approves project applications, initiates and signs state/municipal agreements, approves reimbursements and inspects a sufficient number of projects to ensure all laws, rules, and program requirements are being followed.

The program continues to receive a high degree of support from local officials and the road-building industry. LRIP serves as a significant source of funding for local governments to make needed, long-lasting improvements to their local roads. By statute, projects funded with LRIP dollars must have a ten-year design life. Due to the limited funding and with significant improvement needs on nearly 100,000 miles of local roads in Wisconsin, LRIP assumes even greater importance in the local arena.

WisDOT extends its thanks to the 72 county highway commissioners who serve as LRIP program administrators in each county, as well as to the different organizations representing the program applicants – the Wisconsin Towns Association, the Wisconsin Counties Highway Association, the Wisconsin Counties Association, the Wisconsin Alliance of Cities and the League of Wisconsin Municipalities. These individuals and organizations are fundamental to the effective management of LRIP, and their cooperation and support are critical to its on-going success.

## ***FISCAL YEARS 2002-2003***

---

The 2002-2003 budget provided \$23.0 million in fiscal year 2002 and \$23.9 million for fiscal year 2003, a biennial amount of \$46.9 million which was a \$3 million increase from the prior biennium. The budget act, however, also reduced the amount of entitlement funds available statewide \$2.5 million to fund the West Canal Street project in the City of Milwaukee, per s.84.03(3)(a). After accounting for the earmark, the 2002-03 biennium provided \$44.4 million in state funds for LRIP projects and administrative costs. Individual allocations to each component are identified in the section on *Overall Program Performance*.

With the closure of state fiscal years 2002-2003, LRIP has completed its sixth program cycle. A total of 1,201 projects were approved for this biennium totaling \$43.7 million. This is a similar programming level as the prior biennium when 1,254 projects were funded through LRIP. The \$700,000 difference between the \$44.4 million in available LRIP dollars and the \$43.7 million programming level comes from project savings and unencumbered monies that will be carried over into the 2004-2005 LRIP biennial cycle. County highway commissioners were also provided \$618,086 during the biennium to administer the program at the county level.

## ***OVERALL PROGRAM PERFORMANCE***

---

The following illustrations summarize the performance of the Local Roads Improvement Program for state fiscal years 2002-2003.

As **Figure 1** shows, a total biennial investment of \$43.7 million in LRIP funds were allocated as part of \$172.3 million in LRIP-related road improvements. These LRIP-related road improvements were, at times, part of larger road improvement projects that included work that was either not eligible for LRIP funds and/or did not utilize LRIP funds. The total project costs of the larger road improvement projects amounted to \$201.1 million. Further discussions in this report are based on the \$172.3 million LRIP total project cost level.

While LRIP can reimburse projects up to a maximum of 50% of project costs, on a statewide basis LRIP covered 25% of project costs and the local share amounted to 75%. The \$43.7 million in LRIP funds was invested locally in the following areas:

- \$13.2 million (30.1%) for county highway improvement projects (CHIP);
- \$10.0 million (22.9%) for discretionary county highway improvement projects (CHIP-D);
- \$8.4 million (19.2%) for town road improvement projects (TRIP);
- \$4.7 million (10.8%) for city and village projects in communities with a population of more than 20,000 (MSIPGT);
- \$3.9 million (8.9%) for city and village projects in communities with a population of less than 20,000 (MSIPLT);
- \$2.0 million (4.5%) for discretionary municipal (city and village) street improvement projects (MSIP-D); and
- \$1.6 million (3.6%) for discretionary town road improvement projects (TRIP-D).

**Figure 2** summarizes how the projects were distributed by program component. Of the 1,201 projects funded:

- 592 projects (49.3%) were from the town road improvement program (TRIP);
- 348 projects (29.0%) were on municipal streets in cities and villages with a population of less than 20,000 (MSIPLT);
- 159 projects (13.2%) were from the county highway improvement program (CHIP);
- 41 projects (3.4%) were on municipal streets in cities and villages with a population of more than 20,000 (MSIPGT);
- 39 projects (3.2%) were discretionary county highway improvement projects (CHIP-D);
- 14 projects (1.2%) were discretionary town road improvement projects (TRIP-D); and
- 8 projects (0.7%) were discretionary municipal street improvement projects (MSIP-D).

Table 1 identifies the average cost share distribution of LRIP projects by component. Based on the number of projects and amount of funding, the discretionary components typically provide the highest amount of LRIP funds per project. This trend mirrors the intent of the discretionary

components, which target high-cost projects. The only exception to this trend is in the municipal entitlement provided to large cities and villages (MSIPGT), where almost \$115,000 in LRIP funds are provided, on average, to each project. LRIP covers, on average, between 13% of the costs in the MSIPLT program to 48% of the costs in the TRIP-D program.

Table 1 also identifies, on a statewide average, the local funds and total cost of projects for each component. Local funds, on average, cover between 52% of costs in the TRIP-D program to 87% of the costs in the MSIPLT program. The total cost per project varies from a low of almost \$58,000 for TRIP projects to a high of about \$695,000 for CHIP-D projects.

***Table 1 - Component Profile – Statewide Averages***

<b>Component</b>	<b>LRIP Funds per Project</b>	<b>Percentage LRIP per Project</b>	<b>Local Funds per Project</b>	<b>Percentage Local Funds per Project</b>	<b>Total Cost Per Project</b>
TRIP	\$14,165	24.4%	\$43,857	75.6%	\$58,022
MSIPLT	\$11,173	13.1%	\$74,196	86.9%	\$85,369
MSIPGT	\$114,608	28.3%	\$290,862	71.7%	\$405,469
CHIP	\$82,789	23.1%	\$276,138	76.9%	\$358,927
TRIP-D	\$112,130	48.0%	\$121,377	52.0%	\$233,507
MSIP-D	\$244,798	46.8%	\$278,590	53.2%	\$523,388
CHIP-D	\$256,416	36.9%	\$438,643	63.1%	\$695,059

**Figure 3** illustrates the number and percentage of LRIP projects by improvement type. The program's overall largest investment was for reconstruction projects. Of the four eligible project types, there were 666 reconstruction projects (55.5%), 523 resurfacing projects (43.5%), seven improvements to structures and bridges (0.6%), and five design projects (0.4%).

In some instances, the local improvement greatly exceeds the size of the LRIP project. This indicates the significant investments local governments continue to make in Wisconsin's local roads system, and the important role LRIP funding plays in not only providing state dollars, but in some cases supplementing local funding for these improvements.

## ***DISCRETIONARY PROGRAMS PERFORMANCE***

### ***TRIP-D***

Project selections are made by a statewide committee consisting of six Wisconsin Towns Association (WTA) district directors and six members appointed at large by the Secretary of the Wisconsin Department of Transportation (WisDOT). The committee considers the geographic distribution of projects and does not allow more than one project per county to be approved in any given program cycle. The four major selection criteria for TRIP-D projects, in priority order, include safety projects, reconstruction projects, projects on high traffic volume roads, and joint projects with other communities.

This is the fifth biennium for TRIP-D and it continues to be a popular program with towns across Wisconsin. For state fiscal years 2002 and 2003, applications were received for 46 projects requesting \$6.3 million in TRIP-D funds and totaling \$12.5 million in project costs. This reflected the significant needs of the 62,100 mile town road system in the state, and the ability of townships to undertake large improvements with strong funding assistance. Fourteen projects (30% of projects submitted for consideration) were approved using \$1.6 million in TRIP-D funds (25% of funds requested), a total local share of \$1.7 million and a total project cost of \$3.3 million.

Once again, the magnitude of the proposed TRIP-D projects during this biennium was very significant. Needs outpaced available funding, as only 25% of the funds requested were available and provided through the program. Towns continue to obtain match funds for significant improvement projects financed through TRIP-D. The selection committee's goal continues to be to maintain as close to a 50% state / 50% local match as possible. This approach provides equal treatment for all applicants by not favoring projects with a larger matching share.

### ***MSIP-D***

A statewide committee consisting of six members of the League of Wisconsin Municipalities and the Wisconsin Alliance of Cities selected MSIP-D projects. Members of the committee were nominated by their respective associations and appointed by the Secretary of the Wisconsin Department of Transportation. The four major selection criteria for MSIP-D projects include safety projects, reconstruction projects, projects on high traffic volume roads, and comprehensive planning issues.

For state fiscal years 2002 and 2003, applications were received for 85 projects requesting \$25.6 million in MSIP-D funds and totaling \$51.2 million in project costs. Eight MSIP-D projects (9% of projects submitted for consideration) were funded with \$2.0 million in MSIP-D funds (8% of funds requested), a local match of \$2.2 million and a total cost of \$4.2 million. This is the second biennium for the MSIP-D program and helps to meet the significant needs on the 17,200 miles of village and city streets in Wisconsin. One approved MSIP-D project, County J in the

City of Menomonie (Dunn County), was dropped and the money will be carried over into the MSIP-D component for the 2004-2005 biennium.

#### CHIP-D

CHIP-D committees established in each of the eight WisDOT transportation districts prioritize and select CHIP-D projects. The district committees are made up of all county highway commissioners within each transportation district. The four major selection criteria used by the CHIP-D committees include safety, reconstruction projects, traffic volume, and joint projects with other communities. Fair geographic distribution is a goal of each committee, allowing no more than one project to be approved in any county.

This is the third biennium for the CHIP-D program. For state fiscal years 2002 and 2003, 39 CHIP-D projects were funded with \$10.0 million in CHIP-D funds, a local match of \$17.1 million and a total cost of \$27.1 million. This reflects the significant needs on the 19,700 miles of county trunk highway system in the state.

## ***PROGRAM MANAGEMENT***

---

### ***WisDOT Program Resources***

Since its inception in 1992-1993, LRIP program levels have risen from \$10 million a biennium in state funds to almost \$50 million this biennium. The program has grown in complexity and required a minimum project size with the addition of the discretionary program components, each with their separate statewide and regional selection processes. In addition, the turnover of officials at the local level continues to increase and requires regular outreach and technical assistance activities.

In recognition that timely customer service and multiple methods of communication are paramount to continued program success, WisDOT restructured the available resources for LRIP program management from a single statewide manager to two program managers equally accountable for the program. One manager administers projects in WisDOT Transportation Districts 1 (Madison area), 2 (Waukesha), 5 (La Crosse), and 6 (Eau Claire) while the other program manager is accountable for projects in WisDOT Transportation Districts 3 (Green Bay), 4 (Wisconsin Rapids), 7 (Rhineland), and 8 (Superior). To ensure timely, accurate service to local project recipients and county highway commissioners, WisDOT resources were added at key points in the project application, agreement and reimbursement phases of the program.

### ***LRIP Feedback***

WisDOT believes that LRIP must respond to local governments' needs while continuing to maintain fiscal and program integrity. Staff gathers feedback and uses it to continually improve the program. This assists WisDOT in providing the best service to all the program's users and ensures that local communities participate in structuring the program. It is WisDOT's goal to keep LRIP a simple and user- friendly program.

## ***LRIP PROCESS REVIEW***

---

A formal process review of the Local Roads Improvement Program was completed in 2001. The process review documented current administrative procedures, identified problem areas and developed improvements to the program. The process review included an expansive outreach process using interviews and focus groups with representatives from towns, villages, cities, counties and WisDOT.

The process review found that local communities overwhelmingly view LRIP as a positive program with strong local involvement. Though comments during the review noted that LRIP has less red tape than other state and federally funded programs, stakeholders continued to challenge WisDOT to reduce some administrative steps and paperwork. The process review also identified the need to streamline some procedures to expedite project approvals, bid awards and project completions.

Major improvements that have been made to the Local Roads Improvement Program based on the process review include:

- LRIP applicants have been required to complete a *Contract Award Form* and submit it to their county highway commissioner and WisDOT. The form identifies the contractor(s), award date(s) and award amount(s) for each LRIP project. Beginning with projects in the 2002-2003 program cycle, the *Contract Award Form* has been eliminated and the information is now collected on the *Request for Reimbursement Form*. This change is an example of the paperwork reduction effort that local communities and WisDOT are continually seeking and provides increased administrative efficiencies for the program.
- The processing of LRIP applications had been held until after the January 15<sup>th</sup> statutory submittal deadline. Beginning with the 2002-2003 program cycle, fully complete applications were processed based on a "first in-first out" procedure. This change reduced the processing lag time and expedited the project approval timeline. Communities can award let contracts earlier in the construction season and could receive better prices because of this change.
- Several changes internal to WisDOT were made to automate and streamline the LRIP payment process. Most of these changes were transparent to local communities but assisted WisDOT in processing LRIP paperwork in a more timely and efficient manner. Based on the process review, WisDOT automated the collection and entry of purchase

order numbers from the WisDOT Bureau of Financial Services, eliminating the manual process of keying purchase order numbers. The LRIP database was also reprogrammed to automate the retrieval of Federal Employer Identification Numbers (FEIN) that are used on LRIP project documents. Additional improvement opportunities to the LRIP database and payment process are being analyzed and may be developed in the future.

## ***PROGRAM COMPLIANCE REVIEW: 2000-2001 PROJECTS***

---

Administrative Rule *Trans 206.03(15)(d)* requires WisDOT to review LRIP projects to ensure that the program is functioning according to the rules and requirements governing the program. A review is conducted with a sample of LRIP projects to ensure compliance with Wisconsin Statute 86.31, Administrative Rule *Trans 206* and program policies contained in the *LRIP Informational Packet*.

Compliance reviews have been conducted since the program's inception in 1992 and have included a review of program documents and a field review of projects. Early in 2002, WisDOT performed a process review of this procedure to document current activities and to find ways to improve future compliance reviews. To begin this effort, WisDOT worked with a group of county highway commissioners to review past procedures and to identify current problems and potential solutions. Commissioners that participated in the last set of compliance reviews were selected for this outreach effort. The process review identified the need for a more thorough analysis of documents and field inspections to ensure compliance with program regulations. A checklist was developed through the process review to illustrate the updated procedures that will govern future compliance reviews. The checklist was sent to all county highway commissioners in August 2002 and provided the structure for the compliance reviews that were completed in September and October 2002.

Major LRIP policies analyzed for compliance include, but are not limited to:

- Construction of new roadways and bridges is not allowed with LRIP funds
- Feasibility studies, design, reconstruction, resurfacing and asphalt purchases for local roads and bridges are eligible for LRIP funds
- Improvements funded with LRIP dollars must have at least a ten year design life
- Improvements must meet the minimum road standards in Administrative Rules *Trans 204*, *Trans 205* or Chapter 11-20-1 in the WisDOT Facilities Design Manual unless an exception is requested and granted in advance by WisDOT.
- Projects must be competitively bid
- A State/Municipal Agreement must be signed by the local community and WisDOT prior to awarding a contract
- Projects with eligible costs over \$50,000 must have an Engineers Certification stating a minimum ten year design life and compliance with WisDOT specifications
- Because LRIP is a reimbursement program, the local community must pay the contractor prior to requesting payment from WisDOT

Ten counties were randomly selected for a compliance review in 2002 and four additional counties were selected for review based on input from the LRIP Program Managers. Ten percent of “closed” projects (e.g. completed and reimbursed by WisDOT) from the 2000-2001 program cycle were selected for review in 14 counties. The goal of reviewing 10% of the closed projects from the program cycle amounted to 87 projects at the time audits were scheduled. Projects were then selected in each county to ensure a diverse group of projects based on type of improvement and type of funding. Tables 2 through 4 identify the location, number and types of projects reviewed in 2002.

**Table 2 - Distribution of LRIP Projects Reviewed for Compliance**

<b>COUNTY</b>	<b>NUMBER OF PROJECTS</b>
Burnett	7
Crawford	2
Dane	8
Door	7
Douglas	6
Kenosha	4
La Crosse	5
Langlade	7
Outagamie	7
St. Croix	7
Vilas	7
Waukesha	7
Waushara	6
Wood	7
TOTAL	87

**Table 3 - Types of LRIP Projects Reviewed – By Improvement Type**

<b>IMPROVEMENT TYPE</b>	<b>NUMBER OF LRIP PROJECTS</b>	<b>PERCENTAGE</b>
Reconstruction	61	70%
Resurfacing	26	30%
Bridges	0	0%
Feasibility/Design	0	0%
TOTAL	87	100%

**Table 4 - Types of LRIP Projects Reviewed – By Funding Type**

<b>FUNDING TYPE</b>	<b>NUMBER OF LRIP PROJECTS</b>	<b>PERCENTAGE</b>
TRIP	46	53%
MSIP-LT	6	7%
MSIP-GT	21	24%
CHIP	8	9%
TRIP-D	1	1%
MSIP-D	1	1%
CHIP-D	4	5%
TOTAL	87	100%

Based on their role in the program, reviews were scheduled with the county highway commissioner in each of the 14 counties. County highway commissioners serve as the LRIP coordinator at the county level and project applicants are required to provide their respective commissioner with copies of all project-related documents. Copies of these documents must be kept in county files for at least eight years. The county highway commissioner, or his designee, also accompanied WisDOT staff on the field inspections.

The compliance review analyzed the following documents that county highway commissioners are required to retain for at least eight years:

- LRIP Project Application
- Project Application Checklist
- Project Location Map
- Improvement Plan
- State/Municipal Agreement
- Advertisement for Bids
- Bid Award – Board Minutes and/or Award Letters
- Cost Efficiency Finding (if applicable)
- Engineering Certification (if applicable)
- Exception to Standards (if applicable)
- Request for Reimbursement
- Contractor Invoices

Seventeen (20%) of the projects reviewed were found to be in compliance with the regulations governing LRIP. Fifty-three (61%) of the 87 projects reviewed in 2002 had missing documentation and required follow up. WisDOT sent each of the project applicants a letter requesting transmittal of the missing documents to WisDOT and to their respective commissioner. Table 6 identifies the different types of documentation that were missing from project files.

Forty-three (49%) of the 87 projects were cited for program violations. Table 7 identifies the different types of program violations that were identified through the review process. WisDOT sent each of these project applicants a letter notifying them of the program violation and

reminding them of the LRIP requirements. Three of these projects (3% of the total projects reviewed) were not built to the minimum LRIP road standards and required the LRIP funds to be returned to WisDOT for non-compliance.

**Table 5 - Initial Compliance Findings – Summary**

<b>FINDINGS</b>	<b>NUMBER OF LRIP PROJECTS</b>	<b>PERCENTAGE</b>
In Compliance	17	20%
Missing Documentation	53	61%*
Program Violations	43	49%*

\* - Some projects had both missing documentation and program violations

**Table 6 - Types of Missing Documentation**

<b>MISSING DOCUMENT</b>	<b>NUMBER OF LRIP PROJECTS</b>
Advertisement/Dates Published	46
Improvement Plans	14
Contractor Invoices	12
Board Minutes and/or Bid Letters	11
Engineer Certifications	6
Location Map	4
State/Municipal Agreements	2
TOTAL	53*

\* - Some projects had more than one document missing

***Table 7 - Types of Program Violations***

PROGRAM VIOLATION	NUMBER OF LRIP PROJECTS
Advertisement didn't identify project as an LRIP project	25
Didn't have proper Improvement Plan	8
Contract awarded prior to State/Municipal Agreement	6
Didn't advertise during two consecutive weeks	5
Road not improved to roadway standards	3
Request for Reimbursement submitted prior to contractor payment	2
Wrong road improved per State/Municipal Agreement	1
TOTAL	43*

\* - Some projects had more than one program violation

The findings from the compliance reviews will be used to identify emphasis points for training and in future *LRIP Informational Packets*. Emphasis areas include:

- Provide a clear location map that has an appropriate scale, scale bar, north arrow, and clearly identifies the location of the LRIP project.
- Use an *Affidavit of Publication* to document the bid advertisement. The affidavit, provided by the advertiser, typically includes the block ad and identifies where and when the advertisement was published.
- Do not award a contract until after both the local community and WisDOT have signed the State/Municipal Agreement.
- Retain dated board minutes and/or bid letters documenting the award.
- The improvement must comply with minimum road standards for roadway width and pavement width. If any exceptions to applicable standards may be needed, they must be requested and granted in writing in advance of the improvement.
- Refer to the boilerplate language in the *LRIP Informational Packet* when developing the engineering certification. The certification should contain a statement that the project has been designed with at least a ten-year life and in compliance with WisDOT specifications.
- Remember to request the reimbursement of LRIP funds after the contractor has been paid.
- Retain all LRIP documents for at least eight years.
- When in doubt about program policies, contact the county highway commissioner and/or the WisDOT LRIP Program Managers.

## ***CONCLUSION***

---

The LRIP program continued to perform exceptionally well during its sixth biennium. LRIP provides funds to local governments for road improvements that may not be eligible for any other road improvement funding or successfully compete for other state or federal funds.

The demand for LRIP funds demonstrates significant needs on the local road system. The program's popularity among the local governments and the positive feedback it consistently receives are major factors in its continuing success.

The expanded audit process developed in 2002 illustrates the need for additional education and training activities with local communities. Only one-fifth of the projects audited in 2002 were initially found to be in compliance with LRIP rules and policies while 80% of the projects had missing documentation and/or program violations. WisDOT needs to work with county highway commissioners, the local administrators of the program, along with all program participants, to ensure awareness, acceptance and compliance with the rules and regulations governing the Local Roads Improvement Program.
